

# [Marine Corps] LMARS Usage

- Use of LMARS data
  - No longer used by the Marine Corps
- LRT File from DLA Transaction Services
  - Marine Corps Logistics Command, Logistics Capabilities Center, receives the LRT File from DLA weekly/monthly/quarterly via File Transfer Protocol. The data is used to prepare Marine Corps performance metrics reports. The data is also merged with Retail Data (from SASSY) to create a database from which is generated the monthly CWT report that is used internally at MCLC and sent to DLA. The database that is created is posted to the Precision Logistics Website and is picked up by the Logistics Management Institute (LMI).
